RAICHUR

Resolution:

1. Value added based dental education where students have been given the detail insight of academic programme
2. Regular interaction based on feedback is to be analysed. Feedback is taken from all the stakeholders, analysed and proper action will be taken.
3. To improve the resent knowledge by regular conferences have to be conducted. Students are encouraged for group discussions, seminars, show and do. Slow and advanced learners are identified through internal assessments. Slow learners are given personal attention by extra tutorials and slip tests.
4. The research department should extend its activity to include undergraduate students in research activities. The idea behind this move is to create awareness and interest among graduates about the research process. The department should organize a research program focussing on final year students and interns in various specialties of dentistry. The research environment on the campus has thus percolated into the graduate level.
5. Recent case report and research work are emphasized on regular basic. Interesting cases, research projects and new advances are presented by the postgraduates in a monthly interdepartmental meet.
