

**3.3.1 The Institution ensures implementation of its stated Code of Ethics for research. The Institution has a stated Code of Ethics for research, the implementation of which is ensured by the following:**

- 1. There is an Institutional ethics committee which oversees the implementation of all research projects**
- 2. All the projects including student project work are subjected to the Institutional ethics committee clearance**
- 3. The Institution has plagiarism check software based on the Institutional policy**
- 4. Norms and guidelines for research ethics and publication guidelines are followed**

## INTRODUCTION

Research at the Navodaya Dental College is conducted according to the principles of integrity, academic excellence, accountability, inclusiveness and professionalism. All research must follow appropriate ethical, legal and professional frameworks, obligations and standards. The Code-of Ethics for Research Practice have been composed at par with the principles laid out in other relevant policies, guidelines and codes of conduct, including those of funding bodies.

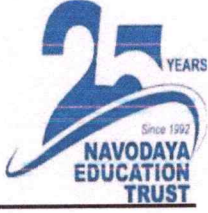

This describes the principles underpinning the ethical conduct of research and defines the process and principles for the objective and rigorous ethical review of research, which falls within its scope. This code applies to all the faculty, students and visiting researchers of the Institute, including persons holding honorary appointments and students on placements, who conduct research within or on behalf of the institute.

## PURPOSE OF THE CODE OF ETHICS

The purpose of the code of ethics in dental research is to establish a set of codes or principles that should help the dental student, intern, faculty or a researcher to reach professional standard guided by legal and ethical principles. Research ethics is the application of ethical codes or principles in scientific investigation. All members of the Institute are individually responsible to ensure their work is conducted in accordance with

the institutional values and policies that form part of the terms and conditions of employment or study. Disregard to this policy may lead to failure of assessed work, suspension of study/research projects, and/or funding from research sponsors and consent to publish.

Research is any original investigation undertaken in order to acquire knowledge and understanding which would include the invention and generation of ideas, images, performances leading to new or substantially improved insights in health care, scholarship such as the creation, development and maintenance of the intellectual infrastructure of subjects and disciplines (e.g., research databases), the use of existing knowledge and experimentation to develop new or substantially improved materials, devices, products and processes, including design and fabrication. Good research practices are based on fundamental principles of research integrity. They guide researchers in their work as well as in their engagement with the practical, ethical and intellectual challenges inherent in research.

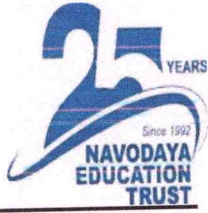

**THESE PRINCIPLES ARE:**

- **Reliability** in ensuring the quality of research; reflected in the design, the methodology, the analysis and the use of resources. .
- **Honesty** in developing, undertaking, reviewing, reporting and communicating research in a transparent, fair, full and unbiased way.

- 
- **Respect** for colleagues, research participants, society, ecosystems, cultural heritage and the environment.
  - **Accountability** for the research from idea to publication, for its management and organization, for training, supervision and mentoring, and for its wider impacts.

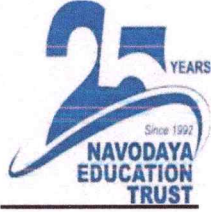

**THE CODE OF ETHICS FOR RESEARCH IS DESCRIBED IN THE FOLLOWING CONTEXTS:**

1. Research Environment
2. Training, Supervision and Mentoring
3. Research Procedures
4. Safeguards
5. Data Practices and Management
6. Collaborative Working
7. Publication and Dissemination
8. Reviewing, Evaluating and Editing

**1. RESEARCH ENVIRONMENT**

- Promote awareness and ensure a prevailing culture of research integrity.
- Demonstrate leadership in providing clear policies and procedures on good research practice and the transparent and proper handling of violations.
- Provides support with good infrastructure for the management and protection of data and research materials in all their forms (encompassing qualitative and quantitative data, protocols, processes, other research artifacts and associated metadata) that are

  
**Dr. GIRISH KATTI** M.D.S.

NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

Navodaya Education Trust ®  
**Navodaya Dental College**  
Raichur

necessary, for reproducibility, traceability and accountability. Promotes research activities by acknowledging and appreciating the researchers with rewards.

## **2. TRAINING, SUPERVISION AND MENTORING**

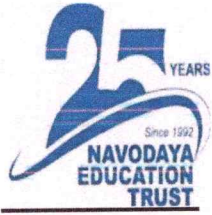

- Ensure that researchers receive rigorous training in research design, methodology and analysis.
- Develop appropriate and adequate training in ethics and research integrity and ensure that all concerned are made aware of the relevant codes and regulations.
- Researchers across the entire career path, from junior to the most senior level, should undertake training in ethics and research integrity.
- Senior researchers, research leaders and supervisors should mentor their team members and offer specific guidance and training to properly develop, design and structure their research activity and to foster a culture of research integrity.

## **3. RESEARCH PROCEDURES**

- Researchers should write and submit the synopsis of intended work/project to the research committee, ethical committee, research grants committee (if required) and clinical trial registry of India (if applicable) respectively.
- Researchers should design, carryout, analyze and document research in a careful and well-considered manner.
- Researchers should make judicious and conscientious use of granted research funds.

  
**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

Navodaya Education Trust ®  
**Navodaya Dental College**  
Raichur

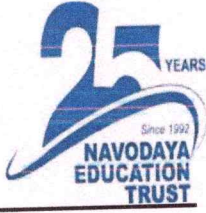

- 
- Researchers should publish results, interpretations of research in an open, honest, transparent and accurate manner and respect confidentiality of data or findings when legitimately required to do so.
  - Researchers should report their results in a way that is compatible with the standards of the discipline and, where applicable, can be verified and reproduced.

#### **4. SAFEGUARDS**

- Researchers should comply with codes and regulations relevant to their discipline.
- Researchers should handle research subjects, be they human, animal, cultural, biological, environmental or physical, with respect and care, and in accordance with legal and ethical provisions.
- Researchers should have due regard for the health, safety and welfare of the volunteering subjects, community, collaborators and other individuals involved in respective research projects.
- Research protocols take account of and are sensitive to, relevant difference-s in age, gender, culture, religion, ethnic origin and social class.
- Researchers should recognize and manage potential harms and risks relating to their research.

#### **5. DATA PRACTICES AND MANAGEMENT**

**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

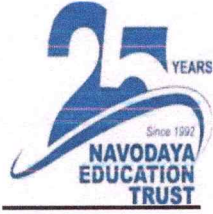

- Researchers should ensure appropriate stewardship and duration of all data and research materials, including unpublished ones, with secure preservation for a reasonable period.
- Researchers should ensure access to data will be in line with the fair Principles (Findable, Accessible, Interoperable and Re-usable) for data management.
- Researchers should provide transparency about how to access or make use of their data and research materials to the institute.
- Researchers, research institutions and other organizations should have a reciprocal acknowledgement for data as legitimate and citable products of research.
- Researchers should ensure that any contracts or agreements relating to research outputs include equitable and fair provision for the management of their use, ownership, and/or their protection under intellectual property rights.

#### **6. COLLABORATIVE WORKING**

- All partners in research collaborations should take responsibility for the integrity of the research.
- All partners in research collaborations should agree at the outset on the goals of the research and on the process for communicating their research as transparently as possible.

**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

Navodaya Education Trust ®  
**Navodaya Dental College**  
Raichur

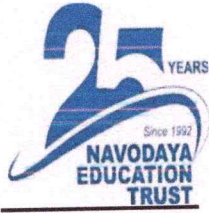

- 
- All partners should formally agree at the start of their collaboration on expectations and standards concerning research integrity, on the laws and regulations that will apply, on protection of the intellectual property of collaborators, and on procedures for handling conflicts and possible cases of misconduct.
  - All partners in research collaborations should be informed and consulted about submissions for publication of the research results.

#### **7. PUBLICATION AND DISSEMINATION**

- All authors are fully responsible for the content of a publication, unless otherwise specified. . All authors should agree on the sequence of authorship, acknowledging that authorship itself is based on a significant contribution to the design of the research, relevant data collection, analysis and interpretation of the results.
- Authors should ensure that their work is made available to colleagues in a timely, open, transparent, and accurate manner, unless otherwise agreed, and are honest in their communication to the general public and in traditional and special media.
- Authors should acknowledge important work and intellectual contributions of collaborators, assistants, funding agencies, and any other individual who have influenced the reported research in appropriate form.
- All authors should disclose any conflicts of interest and financial or other types of support for the research or for the publication of its results.

A handwritten signature in green ink, appearing to read 'Girish Katti', written over a blue ink stamp.

**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

- 
- Authors can issue corrections or retract work if necessary; however the reasons shall be clearly stated. . Authors and publishers should consider negative results to be as valid as positive findings for publication and dissemination.
  - Researchers should adhere to the same criteria as those detailed above whether they publish in a subscription journal, an open access journal or in any other alternative publication form.

#### **8. REVIEWING, EVALUATING AND EDITING**

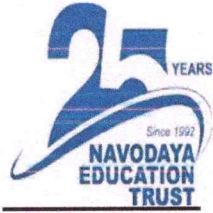

- All the researchers should take seriously their commitment to the research community by participating in refereeing, reviewing and evaluation.
- All the researchers should review and evaluate submissions for publication, funding and reward in a transparent and justifiable manner.
- Reviewers or editors with a conflict of interest should withdraw from involvement in decisions on publication, funding and reward.
- All the reviewers should maintain confidentiality unless there is prior approval for disclosure. . All the reviewers should respect the rights of authors and applicants, and should also seek permission to make use of the ideas, data or interpretations presented.

#### **VIOLATIONS OF RESEARCH INTEGRITY**

It is of crucial importance that researchers master the knowledge, methodologies and ethical practices associated with their field. Failing to follow good research practices

  
**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

Navodaya Education Trust ®  
**Navodaya Dental College**  
Raichur

violates professional responsibilities. It damages the research culture, degrades relationships among researchers, and undermines trust in and the credibility of research. It misuses the resources and may expose research subjects, users, society or the environment to unnecessary harm.

### **RESEARCH MISCONDUCT AND OTHER UNACCEPTABLE PRACTICES**

Research misconduct is traditionally defined as fabrication, falsification, or plagiarism (the so-called FFP categorization) in proposing, performing, or reviewing research, or in reporting research results:

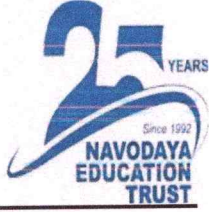

- Fabrication is making up results and recording them as if they were real.
- Falsification is manipulating research materials, equipment or processes or changing, omitting or suppressing data or results without justification.
- Plagiarism is using other people's work and ideas without giving proper credit to the original source, thus violating the rights of the original author(s) to their intellectual outputs.

These three forms of violation are considered particularly serious since they distort the research record. There are further violations of good research practice that damage the integrity of the research process or of researchers.

In addition to direct violations of the good research practices set out in this Code of Conduct, examples of other unacceptable practices include, but are not confined to:

A handwritten signature in green ink, appearing to read 'Girish Katti', written over a blue line.

Raichur

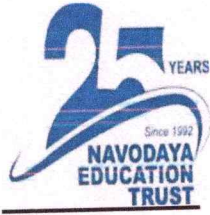

- 
- Manipulating authorship or denigrating the role of other researchers in publications.
  - Re-publishing substantive parts of one's own earlier publications, including translations, without duly acknowledging or citing the original ('self-plagiarism').
  - Citing selectively to enhance own findings or to please editors, reviewers or colleagues.
  - With holding research results.
  - Allowing funders sponsors to jeopardize independence in the research process or reporting of results so as to introduce or promulgate bias.
  - Expanding unnecessarily the bibliography of a study.
  - Accusing a researcher of misconduct or other violations in a malicious way.
  - Misrepresenting research achievements.
  - Exaggerating the importance and practical applicability of findings.
  - Delaying or inappropriately hampering the work of other researchers.
  - Misusing seniority to encourage violations of research integrity.
  - Ignoring putative violations of research integrity by others or covering up inappropriate responses to misconduct or other violations by institutions.
  - Establishing or supporting journals that undermine the quality control of research (predatory journals).
  - In their most serious forms, unacceptable practices are sanctionable but at the very least every effort must be made to prevent, discourage and stop them through training,

A handwritten signature in green ink, appearing to read 'Girish Katti', written over a blue line.

Raichur

supervision and mentoring and through the development of a positive and supportive research environment.

### **DEALING WITH VIOLATIONS AND ALLEGATIONS OF MISCONDUCT**

National guidelines details as to how violations of good research practice or allegations of misconduct are to be handled. However, it always is in the interest of society and the research community that violations are handled in a consistent and transparent fashion.

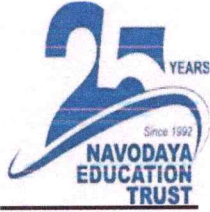

The following principles need to be incorporated into any investigation process.

#### **INTEGRITY**

- Investigations are fair, comprehensive and conducted expeditiously, without compromising accuracy, objectivity or thoroughness.
- The parties involved in the procedure declare any conflict of interest that may arise during the investigation.
- Measures are taken to ensure that investigations are carried through to a conclusion.
- Procedures are conducted confidentially in order to protect those involved in the investigation.
- Institutions protect the rights of 'whistle-blowers' during investigations and ensure that their career prospects are not endangered.
- General procedures for dealing with violations of good research practice are publicly available and accessible to ensure their transparency and uniformity.

---

## **TRANSPARENCY**

- Investigations are carried out with due process and in fairness to all parties.
- Persons accused of research misconduct are given full details of the allegation(s) and allowed a fair process for responding to allegations and presenting evidence.
- Action is taken against persons for whom an allegation of misconduct is upheld, which is proportionate to the severity of the violation.
- Appropriate restorative action is taken when researchers are exonerated of an allegation of misconduct.
- Anyone accused of research misconduct is presumed innocent until proven otherwise.

## **INFORMED CONSENT**

The investigator should comply with the applicable regulatory requirement(s), and should adhere to GCP and to the ethical principles that have their origin in the Declaration of Helsinki.

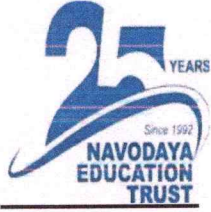

The investigator, or a person designated by the investigator should fully inform the subject or, if the subject is unable to provide informed consent, the subject's legally acceptable representative, of all pertinent aspects of the trial including the written information and the approval/ favorable opinion by the IRB/IEC.

## **RIGHTS OF THE RESEARCHER**

- **THE RIGHT TO RESEARCH FREEDOM**

Researchers at the institute are free to choose the subject of their studies related to the thrust area and to seek support for their research from any appropriate source. Researchers have the right to information required for their research, in so far as there is no legal or moral limitation on furnishing such information.

- **THE RIGHT TO RESEARCH ENVIRONMENT CONDUCIVE FOR RESEARCH**

Institute has the responsibility to create an environment that promotes research and fosters good research.

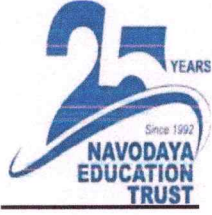

Institute will create an environment in which research can flourish, by, and among other things, visionary policy innovative programs, sound support services, appropriate incentives, effective financial management and mobilization of funding.

- **THE RIGHT TO THE FACILITIES, SERVICES AND OTHER RESOURCES OF THE INSTITUTE**

The institute has [he responsibility, in so far as it is feasible, to make facilitates, equipment and services available for use in research, with a view to the creation of an environment, which is conducive to research.

Where the institute does not have sufficient resources to give effect to this right, it should endeavour to obtain resources to give effect to this right, it should endeavour to obtain resources from other sources and to allocate them to researchers.

Navodaya Education Trust @  
**Navodaya Dental College**  
Raichur

Researchers are allowed to negotiate facilities, funds and other resource from elsewhere for research programmes in case of limited availability of resources, with due permission from Head of Institution.

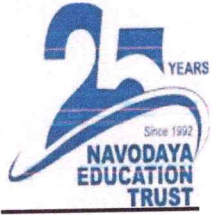

### **INTELLECTUAL PROPERTY**

Researcher should be aware of all the provisions and should themselves to all the regulatory guidelines of the institute. The principles underlying are:

- Promotion of free and creative work to the benefit of science and society as a whole. The conservation of traditional university practices and privileges with regard to the making available and publication of academic works.
- Establishment of ethical standards and procedures with regard to intellectual Property.
- Promotion of creative and innovative research and cooperation by the establishment of mechanisms recognizing the rights of all the parties concerned, promoting the acquisition-of benefits from research and guaranteeing the equitable distribution of benefits from research by establishing principles and procedures for distributing revenue from inventions and creative work (as per the funding agencies); protecting and marketing the institute's assets, including its intellectual property, to the benefit of all interested parties

## **Malpractices & Plagiarism in Research**

Navodaya Education Trust @  
**Navodaya Dental College**  
Raichur

## **PREAMBLE**

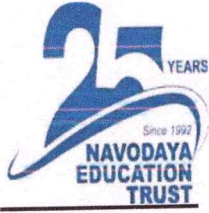

Ethics is the most significant element of the academic activities in teaching and research. Teaching and research forms a novel combination of knowledge transfer which needs freedom to express the knowledge and here in Navodaya dental college it is conducted according to the principles of integrity, academic excellence, accountability, inclusiveness and professionalism. Freedom in the academic process to express the knowledge and invention in the most ethical way. It include the freedom to inquire for innovation of new things in subject that encourage intellectual concern, to present findings, to publish data and conclusions without control or censorship and to teach in the manner they consider professionally appropriate. This requires integrity with the teaching and research. All researchers must follow appropriate ethical, legal and professional frameworks, obligations and standards. The Code-of Ethics for Research Practice have been composed at par with the principles laid out in other relevant policies, guidelines and codes of conduct, including those of funding bodies.

## **MALPRACTICE**

Malpractice has different shades such as 'misconduct, "unprofessional contact, illegal instances, improper things, mismanagement, negligence and the like in the personal conduct/research work/ publications and data thereto either or both of the researcher and guide and also the institution concerned in their research pursuits. Misconduct could include any kind of favoritism/bias/misdeed, "unprofessional contact could include unethical, unprincipled, dishonorable, immoral, cruel or crude actions/ behaviors/ characters in exhibit by any one-the guide or scholar or both. Illegal instances are patently legally void or voidable. Improper things could include or may relate to data/data

**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

source/tools/analysis/reporting- intentional or inadvertent and the like that are of doubtful character or somewhat offending type without authenticity, or so. Mismanagement could relate to resource deployment including funds and include inefficiency in schedule/place/pace of execution and the like. Negligence is either inadvertent behavior or lack of concentration causing resource (people/product/process/facilities) loss or damage. Malpractice has the other dimensionality- scale. Though a minimal tolerance for unintentional malpractices is humane, repeated indulgences will invite punitive reform.

### **Plagiarism:-**

Plagiarism constitutes unethical scientific behavior and is never acceptable. Proper acknowledgement of the work of others used in a research work must always be given. Further, it is the obligation of each author to provide prompt retractions or corrections of errors in published works. There are varying degrees of plagiarism warranting different consequences and corrective action, listed below from most to least serious:

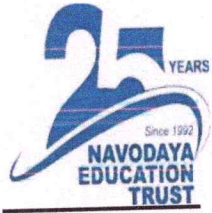

1. Verbatim or nearly verbatim copying or translation of a full paper(s), or the verbatim or nearly verbatim copying or translation of a significant portion(s) of another paper(s).
2. Disclosing unpublished data or findings without permission, even if attributed.
3. Unaccredited verbatim or nearly verbatim copying or translation of individual elements of another paper(s).
4. Unaccredited paraphrasing of pages or paragraphs from another paper(s).
5. Credited verbatim copying or translation of a major portion of a paper without clear delineation (e.g., quotes or indents)

Although the general consensus is that plagiarism is a bad idea, it can be difficult to avoid it or discuss it if we have different understandings of the definition:

- To steal and pass off (the ideas or words of another) as one's own;
- To use (another's production) without crediting the source;
- To commit literary theft;

A handwritten signature in green ink, likely belonging to Dr. Girish Katti, is written over the bottom right portion of the page.

**Dr. GIRISH KATTI** M.D.S.  
PRINCIPAL  
NAVODAYA DENTAL COLLEGE  
RAICHUR-584 103.

- To present as new and original an idea or product derived from an existing source.

Plagiarism could be of two types

- a) Negligent OR unintentional plagiarism: It means innocently or carelessly presenting another person's work as one's own without acknowledging the Source.
- b) Dishonest OR intentional plagiarism: It means knowingly and deliberately presenting another person's work as one's own work without acknowledging the Source.

Possible types of Ethical violations:

- 1) Conflict of Interest: Any action that may result in a conflict of interest must be fully disclosed. When objectivity and effectiveness cannot be maintained, the activity should be avoided or discontinued.
- 2) Disputes about authorship: Proper authorship representation is generally a matter for the involved parties to resolve.
- 3) Duplicate Submission: Duplicate submission abuses the resources of all affected journals, including the valuable time of editors, reviewers, and staff, and is unprofessional and unacceptable.
- 4) Fabrication or misrepresentation of data or results: Any incidence of fabrication or misrepresentation to be an extremely serious breach of professional conduct, with potentially severe ethical and legal consequences.

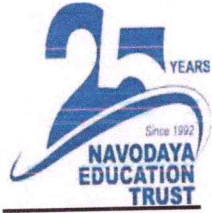

Detection of Plagiarism:

It is the prime responsibility of an institute or individual to distinguish original content from plagiarized work. The detection of plagiarism is a judgment to be made by a person who understands the subject and who is also aware of the definition of plagiarism. Such person should also be aware of the tools available to detect the plagiarism. Our Institute will use the best tools / software to detect plagiarism. It is of an at-most important for an academic institute to educate its student and teaching community about what constitutes plagiarism, how it is detected and of course the action that is going to follow if plagiarism is proved. There are software's available to check the plagiarism. To quote a few:

- 1) <https://www.dupllichecker.com>

**Dr. GIRISH KATTI**  
PRINCIPAL  
NAVODAYA DENTAL COL  
RAICHUR-584 103.

- 2) <https://searchenginereports.net/plagiarism-checker>
- 3) <https://www.copyscape.com/plagiarism.php>
- 4) [www.plagramme.com](http://www.plagramme.com)

Apart from the above in order to detect the plagiarism well known software/ tools (Grammarly, Dupli checker, Copyleaks, Paperrater, Viper, Plagiarisma, Plagiarism Checker, Plagium, Plagscan, PlagTracker etc) can be used.

#### Avoiding Plagiarism

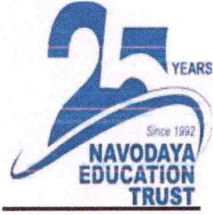

Plagiarism could be avoided by paraphrasing, citing, quoting and referencing the original work. There are five basic rules regarding the use of information in professional and in academic writing:

1. If you use the language of your source, you must quote it exactly, enclose it in quotation marks, and cite the source.
2. If you use ideas or information that is not common knowledge, you must cite the source.
3. If you didn't invent it, cite the source.
4. Unless your professor explicitly tells you to paraphrase, don't paraphrase.
5. When in doubt, cite the source. Doing so can only enhance your readers sense of your honesty.

#### Procedure for handling alleged Plagiarism:-

a. Procedural Fairness : The Institution is committed to deal with alleged plagiarism in accordance with the principles of procedural fairness, including the right to:

- Be informed of the allegations against them in sufficient detail to enable them to understand the precise nature of the allegations and to properly consider and respond.
- Have a reasonable period of time within which to respond to the allegations against them.
- Have the matter resolved in a timely manner.
- Impartiality in any investigation process.
- An absence of bias in any decision making

Navodaya Education Trust ®  
**Navodaya Dental College**  
Raichur

b. Identification and Assessment of Alleged Plagiarism : Where an examiner detects or is made aware of alleged plagiarism by any person, the examiner must report the alleged plagiarism to an empowered body which confirms first if there is a plagiarism or not; if it is, then whether it is negligent or dishonest type and what is the degree of plagiarism. This empowered body will then submit its report along with its recommendation to statutory bodies which are empowered to take disciplinary actions. The severity of plagiarism can be categorized as Plagiarism would be quantified into following levels in ascending order of severity for the purpose of its definition:

- Similarities up to 10% - excluded
- Level 1: Similarities above 10 to 40%
- Level 2: Similarities above 40 to 60 %
- Level 3: Similarities above 60%•

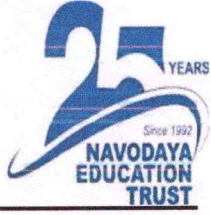

c. Counseling: As the detection of plagiarism and steps to prevent it are important, equally important is to educate students about the dangers of plagiarism. Institution needs to take steps to strengthen the moral of students so that they do not take support of the unfair-means.

d. Guidelines for Action: The Institution will form a committee of about 5 experts who will establish whether there is a plagiarism or not, if it is then what is the level. This committee will have a Head of the Department or the Principal as an ex-officio member. Depending on the severity of crime the punishment could be:

- Fine or warning.
- Rustication for limited period or permanent
- Withdrawal of degree

**Objectives:-**

- i. To create academic awareness about responsible conduct of research, study, project work, assignment, thesis, dissertation, promotion of academic integrity- and prevention of misconduct including plagiarism in academic writing among students, researchers, faculty and other members of academic staff as well as any employee of institution.
- ii. To establish institutional mechanism through education and training to facilitate responsible conduct of research, study, project work, assignment, thesis, dissertation, promotion of academic integrity and deterrence from plagiarism.
- iii. To develop systems to detect plagiarism and to set up mechanisms to prevent plagiarism and punish a student, faculty, or staff of institution committing the act of plagiarism

## **Minutes of Meetings**

NDC/RCR/Cir/2020-21/

Date: 27 January 2021

**CIRCULAR**

This is to inform members of ethical committee that meeting with research committee would be conducted in the principal office to discuss about the staff grants and publication grants on 2<sup>nd</sup> February 2021 at 10.00 AM.

**AGENDA OF THE MEETING**

1. To discuss about the staff grants.
2. To discuss about the publication grants etc.
3. Best paper presentation from each department.
4. Funding of student registration for paper presentation

**MINUTES OF ETHICAL COMMITTEE**

Minutes of the 1<sup>st</sup> meeting of the ethics committee for the academic year 2020-2021 was held on 2<sup>nd</sup> february, 2021 in the principal office at 10.00AM.

The Ethical Committee Meeting of the members for the academic session 2020-2021 started sharply at 10 AM. under the Chairmanship of Shailendra Endodontist . Dr Sugareddy MDS, Orthodontist welcomed all the members to the meeting. Decision on the following was carried forward by the committee.

**The following members were present in the meeting:**

Sr. No	Name of the Members	Designation	Signature
1	Dr.Shailendra MDS, Endodontist	Chairperson	
2	Dr Sugareddy MDS, Orthodontist	Member Secretary	
3	Dr,Prabhakar Patil MD,pharmacologist	Basic Medical Scientist	
4	Dr. Tanveer Ahmed MD Family Physician	Members	
5	Dr. Vajendra Joshi MDS Oral physician	Members	
6	Dr Ravi Patil MDS Oral surgeon	Members	
7	Dr.Asif K MDS Periodontist	Members	
8	Dr.Harsha R.H MDS Prosthodontist	Members	
9	Mr Shashidhar K LLB,Advocate	Legal Expert	

10	Dr Sunil Kumar MD Psychiatrist	Social Scientist	
11	Mr Jayaraj	Lay Person	

**AGENDA ITEM WERE TAKEN UP FOR DISCUSSION.**

**Agenda 1**-Discussion about the staff grants and students was made and was resolved.

**Agenda 2**-Discussion about the publication grants was discussed

**Resolved** -. Research grant of 5000-10000 was suggested by committee for students.

**Agenda 3**-Best paper presentation from each department was selected.

**Resolved**-Best paper presentation from each department was suggested & registration fee to be given by management

**Agenda 4**-Funding of student registration for paper presentation was discussed

**Resolved**-Student registration to be provided by management.

**Agenda 5** – It was said that all the above suggestion will be communicated to the Head of the Institution for the further action. The meeting was closed with the vote of thanks given by Dr. Santhosh Hunasgi MDS, Oral pathology.

Date:10<sup>th</sup> February 2021

**CIRCULAR**

All the Prof. & H.O. D's of Navodaya Dental College, Raichur are hereby informed that they should attend the **ETHICAL COMMITTEE MEETING** on **17<sup>th</sup> February 2021** at **11.00 AM** in Lecture Hall No: 4 without fail strictly along with guides and post graduates, The guide should go through the synopsis study and see that it is complete in all respects and submit in time. Any non-submission or absence to attend the meeting, the concerned HOD'S will be held responsible. Please inform all concerned guides and post graduate of academic year 2020-2021 batch for strict compliance. The approved synopsis has to be submitted to principal office before 25<sup>th</sup> February 2021

**AGENDA OF THE MEETING**

1. Confirmation of the meetings to the last meeting.
2. To Review the Action Taken Report of last Meeting.
3. Discussion on meeting to be held periodically.
4. Discussion on protocols.
5. Clearance on student's research project.
6. Vote of Thanks.

Agenda item were taken up for discussion.

**Agenda 1-** The minutes of previous meetings were circulated. As no comments were received the same may be confirmed by the committee.

**Agenda 2-** The action taken on the resolution taken were reviewed.

**Agenda 3-** It was decided to conduct the meeting at two time points in a year depending upon the number of projects submitted to the committee –

- June –July –Prior to start of academic year of regular batch
- February- March- Prior to start of academic year of supplementary batch

**Agenda 4-** Review of new protocols

Review of protocols for continuation

Review of proposed revision to policy and procedures

**Agenda 5-** Student's research projects to be reviewed periodically to incorporate changes/modifications in the research methodology. No. of proposals to be reviewed 16

**Resolved:** Sixteen students have presented the synopsis, for their thesis, for ethical clearance. Including 6 in-vivo studies and 10 in-vitro studies. 3 postgraduate students were asked to make small changes in the study chosen. 13 studies synopsis were recognized to be valid by the ethical committee and official clearance certificate would be provided by the ethical committee within 4 days.

**Agenda 6 –** It was said that all the above suggestion will be communicated to the Head of the Institution for the further action. The meeting was closed with the vote of thanks given by Dr Sugareddy MDS, Orthodontist.
