

**NAVODAYA  
DENTAL COLLEGE  
& HOSPITAL**

# ANNUAL REPORT 2018-19

# WORDS WITH GRATITUDE

---

**Shri . S . R . Reddy**

Chairman, Navodaya Education Trust®

Shri .S .R . Reddy, Chairman, Navodaya Education Trust®, a pioneer, an entrepreneur, and a social reformer who believes that education need not know any boundaries of growth. It's no small achievement to distinguish oneself in such diverse fields as Medical, Dental, Engineering, Education, and Physiotherapy. Shri. S . R. Reddy is a blessed person by dint of hard work and singular devotion to service. Born to humble beginnings he rose to become one of the doyens of the education sector of North Karnataka.

His pioneering efforts revolutionized the education scenario in North Karnataka. Endowed with sharp business acumen, a balanced perspective and a social bent of mind he set up the Navodaya Education trust in 1992 for furthering his dream of shaping young minds through quality education.

# JOURNEY OF NAVODAYA DENTAL COLLEGE

## *Navodaya Educational Trust (NET)*

*Navodaya Educational trust (NET) is a prestigious institute of Hyderabad, Karnataka region. It was established in the year 1992. It has contributed to this region under the able leadership of Shri. S.R. Reddy. Net campus is filled with educational hubs. which constitutes of colleges under both medical and engineering field -*

*Navodaya medical college (MNC), Navodaya Dental college (NDC), Navodaya College of Pharmacy and Pharma D, Navodaya College of Nursing, and Navodaya College of Physiotherapy and Paramedical sciences and Navodaya of education. NET has separate campuses for Navodaya institute of technology and Navodaya Central School.*

*NET has taken care of Health sector and treating all patients under various schemes. It has been following various Government Health schemes that has been of help to majority of the patients with low economy. Patients are taken care by providing free food and medicines.*

## Navodaya Dental college

Navodaya Dental college, one of the prestigious institutions of Navodaya educational trust, was started in the year 2006-2007 with under graduate course in dentistry, and an annual intake of 100 students. The institution has gained the name of being one of the reputed Private Dental colleges in Karnataka. It is popularly known as NDC and was established with the objective of fortification of the weakest section of the Nation, i.e., Rural Population. NDC was started to serve students with the best dental care and high-quality education by creating requisite infrastructure complemented by start-of-the-art technology, making excellence a natural inspiration, and converting the institute into a premier educational hub. NDC is missioned to create new benchmark in exemplary education driven by consistent commitment towards providing complete

knowledge based solutions fostering total career enlightenment for students and personnel. The institute pushes itself beyond the boundaries to meet the objective of making NDC a centre of academic excellence in teaching, research and community extension services. To provide a gradual learning curve in a student friendly environment for learning. NDC is a promising institute creating dental surgeons empowered to excel in the field of dental science. It focuses on instilling ethical and moral values amongst students to create a compassionate and humane society.

# Clinical Services

## DEPARTMENT OF ORAL MEDICINE AND RADIOLOGY

*“Medicine is only for those who cannot imagine doing anything else”*

Department of Oral Medicine and Radiology is unique in that it combines Oral Medicine and Radiology. It sits at the interface between dentistry and medicine. It is a specialist clinical area of care for treating head and neck medical diseases. Oral medicine is involved in patient care, teaching and researching involving diagnosis of orofacial complex and systematic and behavioural disorders that impact oral health. Oral Medicine and Radiology deals with the acquisition and interpretation of Radiographic imaging studies performed for diagnosis of treatment guidance for conditions affecting the maxillofacial region. In certain cases where mouth symptoms can suggest a connection with disease or problems in other parts of body and it is the oral medicine specialist who can best decide what tests or investigations are needed in these situations. Conditions managed in Oral Medicine are often chronic and may have a significant psychological, as well as physical impact on the patient's quality of life. The Department is missioned to promote excellence in patient care, education and research, in the field of Oral Medicine, and integrating medicine and dentistry to promote optimal health.

# DEPARTMENT OF ORAL AND MAXILLOFACIAL SURGERY

*“Oral and Maxillofacial surgeon only because full time multitasking Ninja isn’t an official job title”*

The department of Maxillofacial Surgery is responsible for surgical treatment of acquired, congenital and traumatic issues related to the jaws and facial regions as well as developmental diseases of these areas. As it is considered the only surgical department in dentistry, it deals with - Facial fractures, Impacted wisdom teeth, dental cysts, salivary gland problems, cancers of head and neck, facial deformity, facial pain, TMJ disorders, and plan and placement of dental implants. OMFS is often seen as the bridge between dentistry and medicine that involves management of medical emergencies in dental chair and treating conditions that require expertise from both backgrounds

# DEPARTMENT OF PEDODONTICS

*"Little teeth need special care"*

Department of Paediatrics is a place where total care is provided to children from birth through adolescence including children with special health care needs. The department focuses on training the undergraduates to develop necessary clinical skills for providing basic dental care to children with emphasis on preventive dentistry. The department holds a friendly reception area which is a visual

treat for children and a strong emphasis is put on prevention of oro-dental diseases in children by providing preventive procedures and appropriate parent and child counselling. The department is of the firm belief that "Every child has a fundamental right to total oral health" and strives towards achieving this end. The department of Pedodontics aims to improve the overall well being of the child and cater to his/her needs and provide a holistic treatment which is satisfactory, ethical and cost effective.

# DEPARTMENT OF PROSTHODONTICS

*“Being a famous designer is like being a famous prosthodontist”*

The department of Prosthodontics and crown & bridge offers diagnosis, treatment planning, rehabilitation and maintenance of oral function while ensuring comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth. It specialises in implant, aesthetic and reconstruction dentistry. The department focuses not just on patients care but also gives equal emphasis on innovative teaching methodologies and researches. The department emphasises on imparting comprehensive skills to undergraduate and postgraduate students.

# DEPARTMENT OF CONSERVATIVE AND ENDODONTICS

*“Endodontist - I get to the ‘root’ of the problems”*

Conservative dentistry is a branch of dentistry which is concerned with the conservation of teeth in the mouth. It embraces the practice of operative dentistry and endodontics and includes various kinds of direct and indirect restorations of individual teeth in the mouth. The primary goal of this department is prevention, diagnosis and treatment of sequelae of dental caries and the other defects of natural teeth; techniques and procedures to restore the teeth to full function and appearance in an aesthetically pleasing manner with as little loss of the healthy tooth structure as possible with periodic check-ups as routine practice. The department has a state-of-the-art technology, dedicated teaching and non-teaching staff and infrastructure to render effective and predictable services to patients.

# DEPARTMENT OF PERIODONTICS

*“Be flawless. Not flossless”*

Periodontology is a branch of dentistry that encompasses the prevention, diagnosis, and treatment of diseases of supporting tissues of teeth and their artificial substitutes. With separate clinics for both undergraduate and postgraduate students, the department has high instructional quality and research which associates its pursuit of excellence with long-term perspective. The aim of the department is to preserve the natural dentition and periodontium to maintain and improve periodontal health, comfort, aesthetics and functions

# DEPARTMENT OF ORTHODONTICS

*"It's never too late to get your smile straight"*

The department of Orthodontics and Dentofacial orthopaedics focusses on craniofacial growth and the development of the dentition and occlusion, while concentrating on prevention and correction of occlusal anomalies. A solid understanding of orthodontics is an essential prerequisite to planning treatment in children and treating complex malocclusion in adults. The department primarily aims to improve the overall well being of the patients and cater to his/her needs and provide holistic treatment which is satisfactory, ethical and cost effective.

# DEPARTMENT OF PUBLIC HEALTH DENTISTRY

*"Tooth is the only part of the body that can't heal itself"*

The department of Public Health Dentistry at Navodaya Dental College is dedicated to training graduate and undergraduate students in community dentistry to work within interdisciplinary teams investigating the risk factors for oral disease, their relation to systemic disease and on the use of oral epidemiological methods to study health outcomes of dental services and oral health policy. Public Health Dentistry is subject designed to help the students to explore professional ethics as they relate to dentist's relationships to peers, patients and the community. Students attend dental camps and perform initial screening examinations. They are sensitised to specific needs of a variety of patient population.

# DEPARTMENT OF ORAL PATHOLOGY

*"Learn to see microscopically"*

The Department of Oral Pathology and Microbiology is a branch of dental science that involves the study and diagnosis of diseases of mouth and jaws through the examination of exfoliated cells, surgically removed tissues (biopsy samples) and body fluids (blood and saliva) using tools of immunohistochemistry, microbiology and haematology. The department deals with teaching the subject of Dental Anatomy, Embryology and Oral Histology for the First BDS course and subject of Oral Pathology and Microbiology for Third year BDS course. The department is involved in training the post graduate students in speciality of Oral and Maxillofacial Pathology and Microbiology. The staffs of the department are actively involved in academic and research activities and have many publications in the international and national journals, delivered guest lectures and presented scientific papers at various platforms.
